HTML Site Review

Hi Catherine!

The site is coming along really nicely! I'm amazed how well you translated the mockup into a real site! The pages you have complete so far are responsive to window resizing so kudos on that! For more detailed and specific visual design/layout feedback please refer back to the previous mockup feedback notes!

The links to the other pages on the home page can be a bit more interactive/visually engaging, removing the underline and making the font a different color to make them stand out a bit more to begin with, then adding the underline back (and maybe even a slight glow) as a hover state would be nice! Make sure that each of the other pages link back to the home page or their own nav bar for better accessibility!

The images on the culinary page do not load properly at the moment, so make sure to double check the path to those files!

Overall a great job so far! Can't wait to see the final product ☺
